EXPERIENCE

Persimmony — Frisco, TX

Design Engineer

Mar 2026 – Aug 2026

- Owned the design system for a from-scratch rebuild of a public health record SaaS platform, working alongside a small product and engineering team.
- Built out the component library and token set that became the backbone of the front end. Not the flashiest work, but everything downstream depended on it holding up.
- Spent a lot of time turning messy data models and compliance rules into UI patterns people could use without a manual.
- Checked in with engineering on implementation as components shipped, catching drift before it became a pattern.

7-Eleven, 7NEXT R&D — Irving, TX

Senior Experience Designer

Sep 2025 – Mar 2026

- Working on the shift from keyword search to intent-driven UI across the app, website, and in-store kiosks.
- Designing how the interface should respond within an LLM-informed intent framework: what the UI does when the system interprets what someone wants instead of matching their exact search.
- Part of the core team defining that framework from the ground up, from early discovery through pilot concepts.
- Built Figma prototypes to get engineering, product, and leadership aligned on interaction behavior before anything got built.
- Started keeping project docs in markdown instead of Notion or Confluence, so I could find things again three weeks later.

Goosehead Insurance — Southlake, TX

Experience Designer

Oct 2023 – May 2025

- Designed a React app on top of Salesforce that replaced the CRM dashboard 2,000+ agents relied on for quoting and binding policies.
- Paired with a front-end developer in a shared Storybook sandbox to build and sign off on components; that setup grew into a monorepo other teams started building on too.
- Spent time understanding how agents were working around the old system's limitations, then built those workaround patterns into the new UI instead of fighting them.
- Ran interviews and some informal hallway testing along the way to keep things grounded in reality rather than assumptions.

Bottle Rocket Studios — Addison, TX

Experience Architect

Jan 2022 – May 2023

- Led discovery for a national grocery chain's curbside fulfillment system, which meant visiting a handful of different store banners to see how each one operated.
- Standardized those differences into one workflow that could scale across all of them.
- Defined the core structure of a companion app for store associates doing order scanning and fulfillment; worked low-fi alongside a visual designer for most of it.
- Piloted new features with store associates and managers before anything shipped wide.
- Worked with the regional analytics team on what data the app needed to capture so reporting downstream made sense.

Experience Designer

Oct 2020 – Jan 2022

- Owned UI for Robert Half's iOS and Android app; inherited an aging design library and took it through a full visual refresh.
- Worked with engineers to keep design and build in sync, running regular QA passes to catch anything that drifted.
- Did full Lottie animation production myself: drew in Illustrator, rigged and animated in After Effects, then packaged everything for handoff.
- Designed for iOS widgets when they first launched in iOS 14, adapting the system to handle a new kind of surface.

Visual Designer

Jul 2020 – Oct 2020

- Brought on short-term to build out visual component libraries for the native Android and iOS apps.

School of Arts & Technology — Richardson, TX

Visual Designer

Sep 2019 – May 2020

Research Assistant

May 2018 – May 2020

EDUCATION

University of Texas at Dallas — Bachelor of Arts, Design

School of Arts, Technology, and Emerging Communication

Academic Bridge Scholarship Recipient

Royal College of Art, London — Executive Education, Creative Leadership

CERTIFICATIONS

AWS Cloud Practitioner — 2025

Google Ads Search Certification — 2024

SKILLS

Disciplines

Design Systems & Component Libraries, Interface Architecture, Design Tokens & Theming, LLM-Informed UI Design, Intent Framework Design, Responsive & Mobile UI Design, Accessibility & Inclusive Design (WCAG), Wireframing & Prototyping, Information Architecture, UX Research (Usability Testing, Interviews, A/B Testing), User Flows & Journey Mapping, Product Strategy & Roadmapping, Art Direction

Design Tools

Figma, FigJam, Framer, Framer Motion, Tokens Studio, Style Dictionary, Zeroheight, Lottie, WeWeb, Webflow, Adobe XD, Adobe After Effects, Adobe Illustrator, Adobe Photoshop

Development Tools

Storybook, Chromatic, Radix UI, shadcn/ui, React, Next.js, Svelte, TypeScript, JavaScript (ES6+), CSS, Tailwind CSS, Vite, Playwright, Vitest, Sanity CMS, Visual Studio Code, Android Studio, Xcode

LLM & Agent Tools

Claude Code, Cursor, Perplexity AI, HeyMarvin AI, Codex, Hermes, Midjourney, Open Web UI, OpenCode, Ollama

Development Environment

Ubuntu, Fedora, Git, Node.js, npm/pnpm, GitHub, BitBucket

Collaboration Tools

Miro, Notion, Jira, Confluence, Sketch, Affinity Designer, Affinity Publisher, Microsoft Office Suite, Salesforce, Tableau

AWARDS

Visual and UX, W3 Awards — Robert Half Mobile, 2022

Best UI and UX Practices, W3 Awards — Robert Half Mobile, 2021

Best in Professional Services, Stevie Awards — Robert Half Mobile, 2021

Inspire Award, First Tech Challenge — Imperial Robotics, 2015

**MEMBERSHIPS &
VOLUNTEER**

Primos, First Generation Career Mentor — 2024

Bold Idea, Technology Mentor — 2022

WPP Network Recruiting Conference, Panelist — 2021

Ambassador, UTD AIGA Student Group — 2018–2020

Court Appointed Student Advocacy, Philanthropy — 2016–2020

Leonardo/ISAST MIT Press, Latin Academic Reviewer — 2019

Executive Member, AO Chapter of Omega Delta Phi — 2018–2019

Dallas World Interaction Design Day Conference, Panelist — 2018–2019
